

Amendments to the Specification:

Please, add the following new paragraph after paragraph [0015]:

[0015.1] FIG. 4 shows a lateral view from the front of the optional embodiment of the Holder for Construction Plans with the linear segment of the cylindrical rod detached, for clarity, from the primary section of the cylindrical rod.

Please, replace paragraph [0024] with the following amended paragraph:

[0024] Optionally, rather than having the longitudinal groove **14**, the cylindrical rod **8** comprises, as shown in FIGS. 3 and 4, a primary section **101** and a linear segment **102** releasably attached to the primary section **101**. Releasable retention of the linear segment **102** is preferably accomplished with a fastener **103** such as a screw or bolt, one or more apertures **104** in the linear segment **102**, and one or more mating apertures **105** in the primary section **101**.
